| Height (2)          | from 453 mm                                         | from 476 mm                                         | from 550 mm                                         |
| Weight (2)          | from 200 kg incl. quick coupler                     | from 265 kg incl. quick coupler                     | from 395 kg incl. quick coupler                     |
| Rotary union        | 5-channel                                           | 5-channel                                           | 5 or 7-channel                                      |
| Work circuit 1 (3)  | 2x G1/2" at 70 l/min                                | 2x G1/2" at 70 l/min                                | 2x G3/4" at 90 l/min                                |
| Work circuit 2      | -                                                   | -                                                   | 2x G1/4" (optional)                                 |
| Drain line          | G1/4" 3 quick couplings on quick coupler (optional) | G1/4" 3 quick couplings on quick coupler (optional) | G3/8" 5 quick couplings on quick coupler (optional) |
| Load hook           | 1.5 t                                               | 2.5 t                                               | 3 t                                                 |

(1) at 250 bar; drain line connection for tilt motor is mandatory!

(2) depending on the quick coupler used

(3) depending on the hydraulic output of the excavator

Suitable for rental fleets

Hammer operation permitted

High-flow rotary union
